Republic Call: July 24, 2025

Let's breakdown what happens to your Certificate of Live Birth after securitization. This is the root of why you hear people wanting to correct their status. This is how you are able to be taxed unjustly.

I updated this post to include the evidence of securitization. I have my Authenticated birth certificate on the state and federal level. Birth Certificate number = 109-89-069077

My cusip report shows the fund it's being traded in, I claimed 10% of the pool, listed the State of Florida and receive acknowledgment from the State of Florida instead of getting accused of Fraud and going to jail.

If this evidence doesn't convince you, nothing will.

Peace and love

The Certificate of Live Birth and Securitization

The implications of securitization, when applied deceptively to a living soul's record like a birth certificate, are deeply spiritual, legal, and commercial. Let's break this down!

I. What Is Securitization?

Securitization is the process of taking an asset (or a future income stream), bundling it, and converting it into a tradable security on the open market. In legal and commercial terms, it involves:

- **Creating a trust or conduit**
- Transferring assets (e.g., loans, receivables, or future value) into the trust
- Issuing **certificates (securities)** backed by the asset pool
- Selling those securities to investors.

Normally, this is done with **consensual contracts** and with **lawful collateral.**

II. The Problem with Securitizing the Birth Certificate

The **birth certificate**, however, is **not a commercial contract**. It is:

- A **vital record** of the arrival of a **living soul** on Earth
- Created by **statutory registration**, which converts the event into a **legal fiction**

When the state registers the birth, it creates a **legal entity** (a transmitting utility or Ens Legis) often in **ALL CAPS**. This is not the living being, but a **corporate person**, a trust or estate presumed to be under state control. Here's what happens next:

The state, without disclosure or consent, securitizes that legal entity by:

- Placing a **CUSIP number** on the birth certificate
- Creating a **bond** through the Department of Treasury or Federal Reserve
- Monetizing the future labor and taxation of the human associated with the entity

This process converts a **record of divine life** into **a commodity**. That is **spiritual fraud**, and it breaches the principles of equity and divine trust.

III. Legal and Equitable Implications

1. Fraudulent Inducement & Non-Disclosure

- There was **no full disclosure** to the parents
- No **meeting of the minds** or lawful **contract**
- No informed consent = **void ab initio** in equity

2. Deceptive Conversion

- The state **converts** the soul's name into a **commercial vehicle**
- This becomes the basis for the **constructive trust** system that governs all citizens

3. False Collateralization

- Since the living soul never agreed, the collateral (i.e., the labor and energy of the man or woman) is **fraudulently pledged**
- Under **UCC 3-305** and **UCC 9**, this makes the security **voidable**, especially if fraud is shown

IV. Separation of the Soul and the Instrument

This is the spiritual crime:

❝ They separate the living soul from its divine identity and attach the **man's spiritual worth** to a counterfeit debtor-entity. ❞

- The **birth certificate** no longer serves its original function as a **record of life**.
- It becomes a **debt instrument, traded globally**, used to back currency.
- The **living soul** is treated as if it were a **surety** for the debts of the Ens Legis.

This is what Allah says:

"They take a small price for the covenant of Allah... So woe to them for what their hands have written, and woe to them for what they earn."
— **Qur'an 2:79**

V. Divine Equity vs. Roman Constructive Trusts

In Divine Equity:

- The **soul is sacred** and belongs only to God
- All contracts must be **truthful**, **voluntary**, and **transparent**
- Fraud vitiates everything

In Roman Law (as applied through U.S. admiralty/statutory systems):

- **All are presumed dead/incompetent**
- **Constructive trusts** govern the estate unless rebutted
- Your **energy is monetized** without your knowledge
