

FULL DISCLOSURE ACT – MEDIA PRESS KIT

The Full Disclosure Act – Global Movement for Government Transparency

Dear News Reporter and Agency,

I'm writing as a supporter of the Full Disclosure Act (FDA) — a rapidly growing global movement now exceeding 4,500 members and expanding daily. The FDA is dedicated to one simple but powerful mission:

Truth and Transparency in the Executive, Legislative, and Judicial Branch

This non-partisan, peaceful initiative calls for open records, honest governance, and full accountability at every level of public service. The FDA's proposal ensures that all public servants — from the postal worker to the President — must disclose all affiliations, whether public, private, or secret.

The movement believes that only through complete transparency can public trust be restored. Citizens across every profession and political background are uniting behind one shared truth:

Secrecy is Slavery. Transparency is Liberty.

The Full Disclosure Act hosts weekly Sunday Strategy Sessions (8 PM Mountain Time) where supporters from across the nation and around the world coordinate on outreach, reform initiatives, and local media engagement.

We invite your newsroom to learn more about this historic citizen-driven transparency movement at:

FOR IMMEDIATE PRESS RELEASE

The Full Disclosure Act: A Global Call for Truth and Transparency in Government
The Full Disclosure Act (FDA) has become one of the fastest-growing citizen movements in modern history, now surpassing 4,500 active supporters worldwide and expanding daily.

The FDA's mission is simple yet revolutionary:

To restore public trust by ensuring truth and transparency in the executive, legislative, and judicial branches of government.

This peaceful, non-partisan initiative calls for open records, full disclosure, and honest governance at every level of public service. Under the FDA framework, all public servants — from the police to the president — would be required to disclose all affiliations, whether public, private, or secret.

*“Transparency is not optional — it is the foundation of liberty,” says **Stephen Theodore Gladstone, founder of the Full Disclosure Act.** “The people have a right to know who represents them, who influences them, and where their loyalties lie. Secrecy has enslaved our systems; truth will set them free.”*

The FDA holds **LIVE Sunday Strategy Sessions (8 PM Mountain Time)** on **Telegram: @FullDisclosureAct** — open to all supporters — where participants collaborate on media outreach, local awareness campaigns, and strategic planning to expand the message of transparency and accountability worldwide.

Citizens, journalists, and public officials alike are encouraged to learn more or get involved at:
